

JOSÉ LUCAS

SOFTWARE ENGINEER

I have experience working with AWS, Kubernetes, GoLang, Python, and many other technologies included in the DevOps environment. Some of the interesting projects I developed over the past years while studying are on display on my GitHub profile. I am interested in work with SRE and DevOps stacks, also with development of automation on this areas.

SKILLS

- Cloud Computing (AWS)
- DevOps stack
- Provisioning and monitoring
- OnCall Support

EDUCATION

SYSTEMS ANALYSIS AND DEVELOPMENT

SpTech School | 2020 - 2022

EXPERIENCE

SOFTWARE ENGINEER

Nubank 2022-2025

In this period I could work with the SRE stack and improve the DevOps culture in the company. Help teams to save money in the AWS, providing a service to build resources in the Cloud and creating many automations to achieve more reliability in diferents services , enviroments and reducing toil as well.

SOFTWARE ENGINEER INTERN

Easynvest 2020-2022

Here was my first experience working in a great company, where I developed dashboards for monitoring services using Grafana, provided support to various teams in cloud computing, and assisted in creating automations within the cloud environment.
